

WELCOME TO THE UCR **CareClub**...

Every year, 47 million Americans live without health insurance and that number is unfortunately projected to rise. In Arizona, over the past eight years average health insurance premiums rose 3.5 times faster than average household earnings and the cost of health insurance now imposes a greater burden on family budgets than ever before.

At **UCR Health Centers**, we are deeply concerned about this growing trend, and the well being of our patients both physically and financially. Individuals and families aren't getting the care they need because of the cost and confusion that exists in healthcare today. That is why we created the **UCR CareClub**.

WHAT IS IT?

The **UCR CareClub** is simple and to the point, and provides our patients with an affordable, transparent healthcare option that levels the financial burden and cuts through red tape. There is **no prescreening** for eligibility, **no denials** for pre-existing conditions, and **no waiting times** to join. It's open to everyone and membership is immediate.

SIMPLE AND AFFORDABLE.

- Choose a payment option and save
